REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The examiner is persuaded by the applicants arguments directed to prior rejections, and although further prior art of record such as Tsai, US patent No. 6,038,566, see for example figure 22, showing bi-directional semantic text labels for object relationships. However, Tsai does not show or suggest the graphical user interfaces as claimed: "a second graphical user interface adapted to enable a user to input arbitrary text to define and store bidirectional text describing relations between related data objects said bidirectional text corresponding to a given pair of related data objects O_1 and O_2 including first text that characterizes semantics of a relationship of object O_1 to O_2 and second text that characterizes semantics of a relationship of object O_2 to O_1 ." As figure 22 is a schematic drawing not an image of the interface also figures representing GUIs, see figure 20, only show the text for one direction and do not allow user entry of text. Thus claim 1 and claims 2-3, which depend from it, are patently distinct over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
